Nicolas Sanloup Announced as Vice President, Business Development of Welty Energy & Infrastructure

*Experienced Leader to Focus on Building Partnerships and Growing New
Energy Projects*

October 17, 2018 – Akron, OH – Welty Building Company, proven partners in comprehensive building services and construction management, recently named Nicolas Sanloup as Vice President - Business Development of Welty Energy & Infrastructure Group. In his new role, Sanloup will be helping Welty to grow its position in energy markets such as Renewable Generation, Distributed Energy Resources and Transmission and Distribution. He will be responsible to guide the growth in the Power and Utilities Sector, creating new strategy through business partnerships to broaden Welty's business as an engineering, procurement and construction management firm.

The electric utility industry has experienced rapid and significant change due to technology, regulations, deregulation and constrained generation assets. Welty Energy & Infrastructure invested in Nicolas' experience and leadership to support the ambitious growth Welty has planned.

Nicolas comes to Welty from Siemens Industry, Inc. where he served as U.S. Head of Transmission Solutions Business Unit reporting to Energy Management Division. He brings with him more than 14 years of global experience in the energy sector focused on business growth, strategy and leadership. Nicolas is known as an expert on high voltage products and turnkey projects across the globe. His last achievement allowed the Transmission Solution business unit to regain its market share, increasing revenues and executing projects that exceeded the expectations of quality, budget and timeliness.

“It’s difficult to imagine that we could have found a more perfect fit for this position than Nicolas,” said Brad Ewing, President and Chief Operating Officer, Welty Energy & Infrastructure. “He has such a breadth of experience and skills that are directly applicable to the direction we are headed towards as a company. His leadership, project management and business development skills will be invaluable as Welty continues to expand its presence in the energy industry and demonstrate its commitment to providing innovative energy solutions to its customers.”

About Welty Energy & Infrastructure

Welty Energy and Infrastructure works with investor-owned utilities while partnering with industry leaders to efficiently and safely manage the construction of transmission and substation projects east of the Mississippi. Welty continues to work with large, regulated utility companies to manage the construction of transmission facilities and substations. With offices in Akron, Cleveland and Columbus, Ohio and Houston, Texas, Welty delivers the most extraordinary building experience by never being afraid to do what’s right – since 1945. In addition to Welty’s work in energy and infrastructure, Welty has had the distinction of creating many prestigious community assets, including the world-renowned Goodyear® Tire & Rubber Company’s new Global Headquarters, a multi-phased, massive expansion to the Pro Football Hall of Fame, Kay Jewelers Pavilion at Akron Children’s Hospital, the City of Akron’s Ohio Canal Interceptor Tunnel, numerous academic buildings at The University of Akron and many others.
